

P.A.D. Education Network

Educating Health Care Providers, Patients and the Community about Lower Extremity P.A.D.

Help us improve the health and health care of patients with P.A.D. by joining the Coalition's P.A.D. Education Network. The P.A.D. Education Network is a membership program for medical practices, multi-specialty clinics, hospitals and health plans committed to the detection and treatment of patients with peripheral arterial disease. By utilizing member resources, you can educate health care providers and patients about the management of P.A.D., enhance community awareness, better position your practice and network with other members.

Who Should Join

- Medical Practices
- Multi-specialty Clinics
- Imaging and Outpatient Surgery Centers
- Hospitals
- Health Plans
- Health Systems

Why You Should Join

Members of the P.A.D. Education Network receive:

- The latest news about P.A.D. Coalition activities and resources
- Free clinical practice tools and patient resources
- Access to members-only website
- Member discounts on additional professional and patient resources
- Free listing in online directory of the P.A.D. Coalition's Education Network
- Resources to promote your membership in the P.A.D. Coalition and recognize your commitment to the care of patients with P.A.D.

How to Join

Complete and submit the enclosed P.A.D. Education Network Application.

P.A.D. Education Network

Health Care Provider Education

Lower extremity P.A.D. Slide Presentation: A Power Point presentation for use in educating referral physicians or other clinicians with an interest in the diagnosis and treatment of lower extremity P.A.D.

Case Studies: Video Files and Slide Presentations:

An innovative approach to clinician education utilizing video patient stories and accompanying slides describing treatment options. Video files can be inserted into Power Point presentations.

Quick Reference Guide: Diagnosis and Treatment of P.A.D.: A laminated reference card based on the 2005 intersocietal *Guidelines for the Management of Patients with P.A.D.*

Presentation Resources: Materials for use in promoting and conducting educational programs for clinicians including a letter of invitation, a step-by-step speaker checklist to prepare a presentation, program evaluation, and a P.A.D. resources order form for medical practices and hospitals.

Community Awareness

Sample Press Release Announcing Practice/Hospital/Health Plan Involvement in P.A.D. Education Network:

A customizable press release to promote your practice's role in disseminating P.A.D. messages.

Stay in Circulation Community Action Toolkit

A tool kit to aid medical practices, hospitals and community groups with increasing P.A.D. awareness. Includes a Power Point presentation on P.A.D and tips for planning community events and working with the media.

Stay in Circulation Fact Sheets: Copies of three fact sheets for African American, Spanish-language and general at-risk audiences for use in community programs.

Stay in Circulation Posters: Posters to increase P.A.D. awareness for medical offices, hospitals, senior centers and other sites. In English and Spanish.

Patient Education

DVD for Medical Offices and Community Programs

- **Stay in Circulation Patient Stories:** Targeted to individuals at risk for P.A.D., this video features the stories of three individuals diagnosed with P.A.D. and provides basic information about P.A.D., symptoms and risk factors.
- **Treatment of P.A.D.:** Targeted to individuals recently diagnosed with P.A.D., this video provides an overview of treatment strategies.

All About P.A.D. Tri-fold Brochure: Patient tools containing information about the symptoms, risk factors and treatment of P.A.D.

Life Saving Tips Reproducible Patient Education Handouts:

A series of nine handouts, written at the sixth-grade reading level, covering different aspects of P.A.D. care. These tools can be co-branded with your practice or hospital logo and photocopied for use with your patients.

P.A.D. Information Scripts for Medical Office Phone Lines:

Sample scripts that can be used to develop recorded messages on P.A.D. for office phone lines.

P.A.D. Newsletter Article for Patient Publications or Practice Web Sites:

A sample article on P.A.D. diagnosis and treatment that can be used in patient publications and practice Web sites.

Wall Chart for Medical Offices: A laminated wall chart featuring graphics of the vascular system and information on P.A.D. risk factors, symptoms, diagnostic tests, and treatment.
